Special characters (Unicode)

Nadeo's games are available in a lot of countries and therefore, the text interpreting engine also supports special character sets from the Unicode charts. Lots of these characters can be used to give your text a sophisticated look.

Maniaplanet supported Unicode characters

Of course not all characters from these listings are supported but quite a lot of them are...

Basic Latin, Supplements and Extensions (standard western alphabet)

CJK Compatibility forms, Ideographs + Symbols & punctuation

CJK Unified Ideographs [Part1](#) [Part2](#) [Part3](#) [Part4](#) [Part5](#) [Part6](#) (huge)

Cyrillic

Devanagari

General punctuation

Greek & Coptic

Hangul Jamo

Hangul Syllables [Part1](#) [Part2](#) [Part3](#) [Part4](#) (huge)

Hebrew

Hiragana & Katakana

Thai

Creating a Linebreak / Vertical text

Open up your favorite text editor, write your letters in multiple lines and copy/paste this multiline text into Trackmania... But please: Don't make your username like this, it will look horrible and cause irritation when playing on servers >8-)
